DETAILED ACTION

Reasons for Allowance

Claims 21-47, 53 and 128-142 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claim 21, the closest prior art of record, Spears et al (Fig. 2) does not disclose the following limitations: the functional limitations of the first mode of operation. Regarding claim 128, the closest prior art of record, Spears et al (Fig. 2) does not disclose the following limitations: the set of impedance transforming networks in cooperation with the first set of impedance matching networks provides a low impedance path to the signal when the second set of impedance matching networks in cooperation with the first set of impedance matching networks and power amplification stage provides a high impedance path to the signal. Regarding claim 136, the closest prior art of record, Spears et al (Fig. 2) does not disclose the following limitations: transmitting the signal along a second signal path defined by the first set of impedance matching networks and a set of impedance transforming networks coupled in series between the input node and the output node.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
